CURRENT
INTEREST

Hi, One of my real pleasures is the challenge of creatively solving complex interconnected technical problems. I have both high level ACAD and some Revit experience, and like working on complex buildings serving art and the public. I'd like to be considered for supervisory technical project architect positions, or doing demanding technical design tasks.

My larger interest is in the whole challenge of the design problem, seeing the user, public and environment as 'clients' to be equally served through the project. Lately I've been doing some consulting and taken time off between projects for research and writing on the subject. I'd like to work with teams that also think about the whole problem.

SUMMARY

Project Architect, Wide Experience in Public Buildings, Design, Detailing, Design Science, Sustainable design methods, Peer Review, CA; ACAD Revit

EDUCATION

University of Pennsylvania, Masters of Fine Arts in Architecture,
St. Lawrence University, B.S. physics
